

DEFECT TRACKING

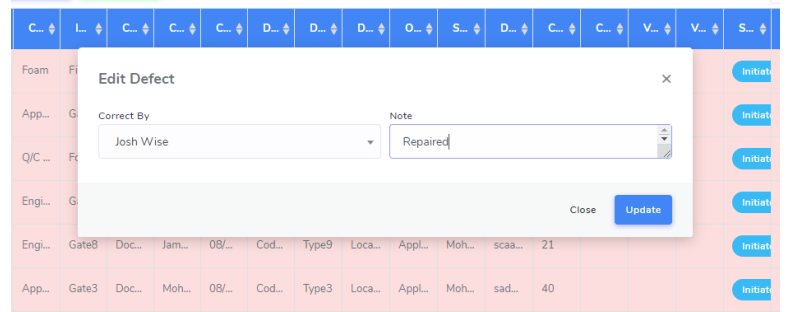

TRACK DEFECTS

- Intuitive interface allows front end users to quickly and easily capture defects at the point of discovery
- Democratizing defect reporting instills a culture of quality across you entire team.

IMPROVE QUALITY

- Capture, contain, and correct defects before they reach finished goods.
- Defect verification means that corrections are verified before they can be resolved.

MEASURE SUCCESS

- Detailed reporting shows decision makers strategic data so they can guide their quality efforts
- Connect Gigbot with Resolve: Issues Management System to turn defect trends into manufacturing issues to be work with Resolve's problem solving framework.
